

The Series 457 Model 184 Quiet-Pac[®] blower package by Dynamic Air Inc. provides the ultimate in reducing the sound level, down to 85 dBA or less. The complete blower and motor are enclosed in a sound attenuating acoustical enclosure. Four access doors are provided for maintenance of all components. A cooling fan is also included for maximum motor protection and life. The blower

package comes completely preassembled for ease of installation. A heavy-duty frame supports the acoustical enclosure and counterbalanced base and it is complete with vibration mounts as standard. The Quiet-Pac blower package is available in any size desired to suit even the most demanding of applications.
